Education

Inglemoor High School, Kenmore WA | June 2023

- Relevant Coursework: Web Design & Computer Science
- Professional Development: TA for intro Web Design class

Skills

- Interface design
- Website optimization
- Application design
- Full-stack development
- HTML/CSS/JS
- UI/UX implementation
- Knowledgeable in Git/GitHub
- Discussion facilitation
- Verbal and written communication

I'm a long time programmer who has found their niche. I enjoy working on systems that improve user experience in some way, whether that be through user-facing systems that handle UI/UX, or developer facing APIs with a focus on developer experience.

Experience

Teacher's Assistant

Inglemoor High School, Kenmore, Wa | September 2022 - January 2023

- Supported classroom activities, tutoring, and reviewing work.
- Helped to develop materials to support instruction and in class activities.

Volunteer Work

- Organized and ran multiple charity events raising over \$7,500 for Child's Play. (<https://tiltify.com/+pa-league/profile>)
- Participated in multiple other events raising over \$40,000.

Projects

Lead Developer

The Pitwall, June 2022 - July 2023

- Created a real time number tracking tool for sim-racing.
- Gained data management skills as well as experience in managing high traffic, real time applications.

Developer

Quantum Flux, January 2024 - April 2024

- Assisted game development by working on core game systems.
- Created systems for user interfaces and interaction.
- Learned effective strategies for working in small teams.

Developer & Buildmaster

Forge Fiasco, September 2024 - April 2025

- Created initial core engine prototype.
- Worked on many user facing systems such as game UI, tutorials, and editor.
- Focused on backend systems (serialization, messaging, analytics, etc.) with a focus on developer experience.
